Professional Summary

Python Full Stack Developer with 2+ years of experience building scalable financial technology (fintech) and enterprise applications using Django, Django REST Framework, Next.js, Kafka, and PostgreSQL. Experienced in developing REST APIs, event-driven systems, authentication workflows, integrating **Generative AI** using Google Gemini API to enhance automation and intelligence in financial platforms and responsive frontend applications. Strong background in backend architecture, database optimization, micro-services, and production-ready system design for lending and KYC platforms.

Technical Skills

Languages: Python, JavaScript, TypeScript

Backend: Django, Django REST Framework, REST APIs, Kafka, Celery, Redis, Micro-services

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, ShadCN UI, React Query, Zustand

Databases: PostgreSQL, CockroachDB, MySQL

DevOps & Tools: Git, GitHub, Docker, GCP, Gemini API

Core Concepts: JWT Authentication, Authorization, API Integration, Event-Driven Architecture, Background Processing, System Design, Performance Optimization, Scalable Architecture

Key Achievements

- Built scalable fintech APIs supporting lending, repayment tracking, and KYC verification workflows.
- Designed Kafka-based event-driven systems for asynchronous transaction handling and real-time processing.
- Improved backend performance through PostgreSQL query optimization and modular service architecture.
- Developed secure authentication and authorization workflows for enterprise-grade applications.

Professional Experience

Gowdanar Technosoft Pvt Ltd – Bangalore

Software Developer

Nov 2023 – Present

Python, Django, Next.js

- Engineered scalable fintech and enterprise applications using Django REST Framework and Next.js for secure and high-performance workflows.
- Built and maintained 20+ REST APIs supporting authentication, onboarding, transaction management, and real-time financial operations.
- Enhanced API performance and reduced query execution time through PostgreSQL query optimization, indexing, and backend logic improvements.
- Contributed to modular micro-services architecture improving scalability, maintainability, and service-level reliability.
- Executed secure JWT authentication and role-based authorization workflows for protected API access and user management.
- Integrated third-party APIs and streamlined backend workflows to improve reliability and reduce manual processing effort.
- Delivered responsive frontend interfaces and scalable backend systems for real-time enterprise and financial technology applications.
- Collaborated with frontend developers, QA teams, and product stakeholders to release production-ready features and resolve critical issues.
- Troubleshoot production issues, supported deployment workflows, and optimized application performance across multiple backend services.

Projects

MvLEND – Composable Core Banking & Lending Platform | *Django* | *Kafka* | *CockroachDB* | *Next.js* | *TypeScript*

- Architected a scalable digital lending platform supporting borrower onboarding, loan processing, repayment tracking, and fund disbursement workflows.
- Designed Kafka-based event-driven workflows for asynchronous transaction handling and real-time financial updates.
- Developed RESTful APIs for loan lifecycle management, transaction processing, repayment operations, and account handling.
- Created responsive dashboards and workflow interfaces using Next.js and Tailwind CSS for operational monitoring and user management.
- Enhanced system reliability using API gateway patterns including caching, rate limiting, and circuit breaker mechanisms.

MvKYC – KYC Verification Platform | *Django* | *REST APIs* | *CockroachDB* | *Next.js* | *Sui Blockchain*

- Developed a secure KYC verification platform supporting Data Owner, Verifier, and Seeker workflows for digital identity validation.
- Integrated blockchain-based NFT verification using Sui Blockchain to enable tamper-proof identity authentication and secure KYC validation.
- Built backend APIs for onboarding, document verification workflows, user management, and secure data handling.
- Designed frontend interfaces for document uploads, verification tracking, and dashboard management using Next.js.
- Implemented role-based authentication and authorization workflows to ensure secure access to sensitive user information.

Education

Visvesvaraya Technological University

Bachelor of Engineering in Mechanical Engineering

Graduated: 2021

CGPA: 7.1 / 10
