

GANESH MIRASHI

Python Full Stack Developer

+91-7349419357 | ganeshmirashi62@gmail.com | LinkedIn | GitHub

Professional Summary

Python Full Stack Developer with 2+ years of experience building scalable fintech and enterprise applications using Django, Django REST Framework, Next.js, Kafka, PostgreSQL, Redis, and Docker. Experienced building REST APIs, authentication workflows, event-driven systems, database optimization, and responsive frontend applications. Skilled in backend architecture, distributed systems, microservices architecture, scalable system design, and integrating Generative AI workflows using Google Gemini API for workflow automation and intelligent financial processing.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL

Backend: Django, Django REST Framework, REST APIs, FastAPI, Kafka, Celery, Redis, Microservices Architecture

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Shadcn UI, React Query, Zustand

Databases: PostgreSQL, Cockroach Database, MySQL

DevOps & Cloud: Git, GitHub, Docker, GCP, CI/CD

Core Concepts: JWT Authentication, RBAC, API Integration, Event-Driven Architecture, Distributed Systems, Background Processing, System Design, Performance Optimization, Scalable Architecture

AI Integration: Google Gemini API, Generative AI Workflows

Key Achievements

- Built scalable fintech APIs supporting lending, repayment tracking, and KYC verification workflows.
- Implemented Kafka-based event-driven systems for asynchronous transaction handling and real-time processing.
- Optimized backend performance through PostgreSQL query tuning and modular service architecture.
- Established secure authentication and authorization workflows for enterprise-grade applications.

Professional Experience

Gowdanar Technosoft Pvt Ltd – Bangalore

Software Developer

Nov 2023 – Present

Python, Django, Next.js

- Engineered scalable fintech and enterprise applications using Django REST Framework and Next.js for secure and high-performance workflows.
- Managed and maintained 40+ REST APIs supporting authentication, onboarding, transaction management, and real-time financial operations.
- Enhanced API performance and reduced query execution time through PostgreSQL query optimization, indexing, and backend logic improvements.
- Contributed to a modular microservices architecture, improving scalability, maintainability, and service-level reliability.
- Executed secure JWT authentication and Role-Based Access Control (RBAC) workflows for protected API access and user management.
- Integrated third-party APIs and streamlined backend workflows to improve reliability and reduce manual processing effort.
- Delivered responsive frontend interfaces and scalable backend systems for real-time enterprise and fintech applications.
- Collaborated with frontend developers, QA teams, and product stakeholders to release production-ready features and resolve critical issues.
- Resolved production issues, supported deployment workflows, and optimized application performance across multiple backend services.

Projects

MvLEND – Composable Core Banking & Lending Platform

Django | Kafka | Cockroach Database | Next.js | TypeScript

- Architected a scalable digital lending platform supporting borrower onboarding, loan processing, repayment tracking, and fund disbursement workflows.
- Implemented Kafka-based event-driven workflows for asynchronous transaction handling and real-time financial updates.
- Built REST APIs for loan lifecycle management, transaction processing, repayment operations, and account handling.
- Created responsive dashboards and workflow interfaces using Next.js and Tailwind CSS for operational monitoring and user management.
- Strengthened system reliability using API gateway patterns including caching, rate limiting, and circuit breaker mechanisms.

MvKYC – KYC Verification Platform

Django | REST APIs | Cockroach Database | Next.js | Sui Blockchain

- Engineered a secure KYC verification platform supporting Data Owner, Verifier, and Seeker workflows for digital identity validation.
- Integrated blockchain-based NFT verification using Sui Blockchain to enable tamper-proof identity authentication and secure KYC validation.
- Constructed backend APIs for onboarding, document verification workflows, user management, and secure data handling.
- Designed frontend interfaces for document uploads, verification tracking, and dashboard management using Next.js.
- Developed Role-Based Access Control (RBAC) workflows to ensure secure access to sensitive user information.

Education

Visvesvaraya Technological University

Bachelor of Engineering in Mechanical Engineering

Graduated: 2021

CGPA: 7.1 / 10
